Student Experimental Project

SCHOOL
Faculty of Science

CAMPUS
Belle-Beille

LEVEL
2nd year Master's degree

OPEN TO EXCHANGE STUDENTS
Yes

SEMESTER
Fall (S1)

- **Degree course:** Light, Molecules, Matter
- **Teaching unit:** UE1
- **Course language:** English
- **Duration (hours):** 30
- **ECTS:** 3
- **Teacher(s):** CANEVET David

Assessment:

- [x] Continuous assessment
- [ ] Final exam

Teaching methods:

[ ] Lecture course		hours
[ ] Tutorial course		hours
[x] Practical work	30	hours

[ ] Case study
[ ] Project

COURSE DESCRİPTİON

During the student experimental project, students will be immersed alone (or in pairs) in the host research laboratory under the responsibility of a supervisor.

Over a period of 4 weeks, after bibliographic research work, students will set up the realization of the corresponding manipulations/calculations/analyses. This project should take place as independently as possible. At the end of the project, each student will submit an individual report written in English describing their investigations, analyses and conclusions. The assessment will also be supplemented by an oral defense in English which will provide the mark for the English evaluation as well. The student experimental project or tutored project must be the subject of an internship agreement.
